## Mandalorian - Disruptor Rifle

### How I imagine that the “disintegration” will work when the player has interacted with the wall

- The wall splits apart in chunks

It cracks up

It gets flung back with some force

This happens at the same time

- At the same time, the chunks gets flung backwards with some force
- When the “flunging” happens it starts to disintegrate similar to how it’s done with Energy weapons in Fallout New Vegas/Fallout 4
- Afterwards there are some fire particles left over
  - Similar to the scene (linked in this document) in “Singularity - Fire Particles”
